

Application of sun cream/hot weather protocol.

Policy

Children should be protected from the sun, especially during peak times of the day. Children should wear sun protection lotion and suitable clothing to keep them safe.

Procedure

During sunny weather children must have sun cream applied by a parent or carer before entering pre-school at 9am. You may apply your own or the one provided by pre-school which is an all day factor 50 cream which will be left out daily by the signing in register.

If we feel that your child requires a second application a member of staff will do this, usually after lunch.

Children must bring a hat to pre-school to protect their head if they wish to play outside. The legionnaire's style hats with the material protecting their necks are recommended.

Unlimited water is provided during hot weather and children will be encouraged to drink little and often.

We have the right to stop children going outside if the temperature is too hot and could cause health problems.
